- 4.9.3. The chronograph must be properly set up in accordance with the manufacturer's recommendations and verified each day by Match Officials in the following manner:
 - 4.9.3.1. At the beginning of the first day of the match, a Match Official will fire 3 rounds from the supply of the official match calibration ammunition through the calibration firearm over the chronograph, and the average velocity of the 3 rounds will be recorded;
 - 4.9.3.2. On each of the following match days, the process will be repeated using the same firearm and ammunition supply (ideally from the same factory lot);
 - 4.9.3.3. The chronograph will be deemed to be within tolerance if the daily average velocity is within 25fps of the average velocity achieved above;

 - 4.9.4.4. If the resultant Muzzle Velocity exceeds the relevant Division maximum, the competitor may, at the Match Directors discretion, continue shooting the match, but

his scores will not be entered into match results nor count for match recognition and awards.

- 4.9.4.5. If a competitor's ammunition is retested, or if any authorized replacement ammunition is used, and different Muzzle Velocities are recorded when tested according to these rules, then the competitor shall be Disqualified.
- 4.9.4.6. The scores of a competitor who, for any reason, fails to present his rifle for testing at the designated time and location and/or who fails to provide sample rounds for testing whenever requested by a Match Official, will be removed from the match results, and, at the Match Directors discretion, the competitor may be removed from the match.
- 4.9.4.7. If the Match Director deems that a chronograph has become inoperative, and further testing of competitor's ammunition is not possible, the Muzzle Velocity of competitors which have been successfully tested will stand, and the Muzzle Velocities declared by all other competitors who have not been tested will be accepted without challenge, subject to any applicable Division requirements.

 - 4.10.3.1. The rifle may be recocked between each test.
- 4.10.4. If during any of the 3 tests performed; the firing pin activates, then the rifle will be deemed to have failed the simple Drop Test.
- 4.11. Should a rifle fail this test, then it is deemed unsafe for competition, and it shall not be allowed to be used at that competition until it passes.
 - 4.11.1. The competitor may withdraw to the Safety Area to attempt to rectify the problem.
